INSPECTION RESULTS

Approved Disapproved

Inspector Signature _____ Date _____

Approved Incentive Amount \$ _____ (\$200)

Comments _____

1. Eligibility

Tampa Electric's Energy Management Incentive Program offers incentives to any existing commercial/industrial customer on firm rates who install qualifying projects.

2. Qualifications

Facilities must have a central ducted HVAC system with electric heat or air conditioning that is accessible for inspection and repair. The HVAC system shall not exceed 65,000 Btu's.

3. Incentive Amounts

Customer incentive is up to \$200 per HVAC unit.

4. Application and Worksheets

With their applications, Customers must submit diagram of the air distribution system indicating the location of all supply vents, return vents, and air handler. Tampa Electric will review all applications and accompanying worksheets for eligibility. If any proposed project does not meet program requirements, Tampa Electric will notify Customer, specifying the basis for rejection of the application.

5. Final Inspection and Incentive Payment

When installation is completed, customer must notify Tampa Electric and submit original invoices (or direct photocopies) specifying the type of equipment, and installation costs. Tampa Electric will then schedule and conduct a post-installation inspection.

The actual incentive amount will be determined based on the inspection, and may vary from the original estimate.

6. Tax Liability and Credits

Tampa Electric is not responsible for any taxes which may be imposed on the Customer's business as a result of projects installed under this program. The Customer's tax adviser should be consulted about the taxability of the rebate and the availability of tax credits. Customers must provide their tax I.D. or Social Security number on the application form.

7. Resolution of Differences

In the course of this program, disputes may arise regarding Customer's eligibility, energy-saving potential of proposed projects, incentive amounts or other issues. Customer may submit data to Tampa Electric in support of their position. However, Tampa Electric determination on these issues will be final.

8. Disclaimer

Tampa Electric does not guarantee that implementation of energy conservation measures or use of the equipment pursuant to this program will result in energy or cost savings. Tampa Electric recommends that Customers consider engaging qualified engineers or other consultants to evaluate the effects of such implementation and use on energy consumption, cost savings and the operation of Customers' facilities.
