

Protect Your Home Against Surges

Surge protectors can divert damaging surges away from your appliances and home electronic equipment. Tampa Electric's Zap Cap Systems® provides a two-layer approach to surge protection.

The first layer is a primary unit at the main service line that is designed to absorb a large amount of transient surges before they get into the building wiring. The second layer is quality plug-in protectors installed in your home to protect sensitive electronic equipment such as TVs and computers.

Through this layered system, the main service unit diverts most of the surge energy while the individual plug-in units provide additional protection from residual let-through voltage.

LIFE RUNS ON ENERGY®

Advanced Surge Protection for Your Home

The Basic System

Zap Cap Systems® is designed as a two-layer system to help protect your home electronics and major appliances from damaging high-voltage surges. The system includes:

- A **primary unit***, installed behind or near your electric meter, leased through Tampa Electric for \$6.95, plus tax per month and a one-time installation charge of \$44.95, plus tax. This unit helps protect major appliances from damaging surges. A two year commitment is required.

Please note, depending on the size of the electric service to your home, you will receive one of the following primary units:

Meter based unit for homes 200 Amps or less

Hardwire unit for homes with greater than 200 Amps up to 400 Amps

- **Plug-in protectors**** designed to help protect sensitive electronic equipment such as TVs and computers. To get started, you may choose a **free** multimedia plug-in protector, or **upgrade** to a deluxe plug-in protector as part of your initial installation package for the discounted price of \$30 plus tax.

**The primary unit is owned and maintained by Tampa Electric Company and cannot be tampered with in any way.*

***All plug-in surge protectors are the property of the customer after payment.*

Customize Your System

For added protection, and to take advantage of the manufacturer's warranty, Tampa Electric recommends purchasing additional plug-in protectors for each additional electronic item in your home.

The **single-outlet protector** helps protect individual household electronics such as microwave ovens and garage door openers. This model features a lifetime \$50,000 connected equipment warranty from the manufacturer. *\$11.95, plus tax.*

The HDTV-ready **multimedia 8-outlet surge protector** is designed for home theater equipment (TVs, DVD players, stereo equipment, antennas), as well as computers, modems and routers. Each outlet is spaced to accommodate small power supplies and the coaxial pass-through connections are universal for cable or satellite systems. This model features a \$50,000 lifetime limited connected equipment protection policy from the manufacturer. *\$49.95, plus tax.*

The HDTV-ready **deluxe 8-outlet surge protector** has the same features as the multimedia model, but also includes additional cable and telephone connectors and cords. This model features a \$100,000 lifetime limited connected equipment protection policy from the manufacturer. *\$79.95, plus tax.*

All plug-in protectors feature diagnostic lights. The multimedia and deluxe satellite plug-in protectors also feature protect or disconnect circuitry.

System Installation

Tampa Electric will install your meter-based primary unit within ten to 15 working days from your order date, weather permitting. If you are not home during installation, please ensure that your meter is accessible to our technician. Your power may be momentarily interrupted during installation. Your plug-in surge protectors will be delivered to your home at the time of installation.

Once your system is installed, the monthly charge of \$6.95 plus tax will be added to your electric bill.

If you notice that the diagnostic lights (red LEDs) are not illuminated, please contact **1-877-SURGE-22** to report the problem. If necessary, we will replace the unit.

To learn more and sign up, please visit **tampaelectric.com/surgeprotection** or call toll-free **1-877-SURGE-22 (1-877-787-4322)**.

Zap Cap Systems® Manufacturer Warranty*

Eligibility for service subject to credit approval. Some exceptions and restrictions apply. All warranties are provided and serviced by the product manufacturer and not by Tampa Electric Company. Information about the manufacturer's warranty is available at **tampaelectric.com**.
