NOTE: A, B, AND V ARE SHOWN IN DETAIL 1

NOTES:

- Where wires, conductors, cables, or unguarded rigid live parts are over a swimming pool or the surrounding area, the clearances (with no wind displacement) in any direction shall be not less than those shown in Table 1 and Detail 1.
- These rules do not apply to a pool fully enclosed by a solid or screened permanent structure.
- These rules do not apply to communication conductors and cables, effectively grounded surge-protection wires, neutral conductors, guys and messengers, supply cables of 0 to 750 V meeting Rules 230C2 or 230C3 when these facilities are ten (10) feet or more horizontally from the edge of the pool, diving platform or diving tower.
- Direct buried underground supply cable should not be installed within five (5) feet of swimming pool or its auxiliary equipment. If five (5) feet clearance is not attainable, supplemental mechanical protection shall be provided. Acceptable supplemental protection is rigid galvanized conduit or schedule 80 PVC conduit.
- See NESC Rule 234G for clearance adders for voltages above 22 kV to ground.
- See GR&S 3-9
