helping customers use
energy wisely.**

ENERGY-SAVING PROGRAMS

Start Saving with an Energy Audit

Online Energy Audit

Go to TampaElectric.com/EnergyAudit and complete a personalized audit. Once you log in using your existing Tampa Electric username and password, you'll receive a customized report that uses your home's actual energy consumption. Our online audit lets you monitor usage, tap into informative videos and more. Our energy experts encourage you to revisit your personalized audit throughout the year to monitor your usage, review seasonal tips and more.

In-Home Energy Audit

Schedule a free in-home audit with one of our energy experts by calling **813-275-3909**. Our analyst will inspect your home, identify areas where you can save, recommend additional savings through our many energy-saving programs, provide year-round tips and more.

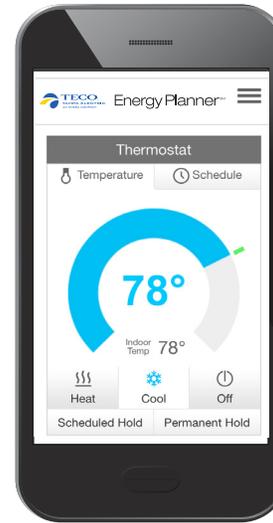

Prime Time Plus™

Sign up to earn credits on your monthly bill without changing your thermostat settings or when you use electricity. We'll install a free smart thermostat to help cut heating and cooling costs by more than 20%. Plus, you'll get a mobile app to customize settings, receive usage reports and get alerts. You earn credits by allowing

Tampa Electric to briefly turn off your heating, cooling, water heater, pool pump, and EV charger (if applicable) during periods of extremely high demand for electricity. Saving is simple with Prime Time Plus.

Energy Planner

By making simple adjustments to your electricity use, you can take advantage of lower rates available 87 percent of the time and during all hours on weekends and holidays. With access to your broadband internet connection, you can program your thermostat and appliances remotely. Energy Planner is free and we'll show you how to make the most of it.

Ceiling Insulation

Poor levels of insulation in your attic will let energy escape, costing you money as well as comfort. Before you install insulation, call Tampa Electric to schedule a Tampa Electric analyst attic inspection. If ceiling

insulation is recommended, we will pay \$0.16 per square foot of R-11 insulation installed. In addition, the analyst will provide you with a rebate certificate that is valid for one year and a list of approved contractors to perform the work.

Ductwork

A leaky air duct system could send your energy bill through the roof. Our Ductwork program can help. A pre-approval inspection by a Tampa Electric energy analyst is required. The analyst will inspect your home's duct system for accessibility and repair needs. If approved, the analyst will provide you with a list of Tampa Electric-approved contractors. The contractor will seal all leaks and help minimize future leaks - all for only \$125*. Call the number on this brochure to schedule a Ductwork appointment.

**Having more than one heating & cooling system and extensive repairs or replacement of existing ductwork will result in increased fees.*

ENERGY STAR® New Construction

The ENERGY STAR label on a home or multifamily building means that it has been designed and built to standards well above other new construction on the market, delivering energy efficiency savings up to 30 percent when compared to typical new construction. We offer the following rebates:

- **Builder Rebates:** Contractors that build residential homes utilizing high-efficiency building techniques that meet ENERGY STAR standards will qualify for a rebate of \$425.
- **Multifamily Rebates:** Owners or developers that build multifamily buildings utilizing high-efficiency building techniques that meet ENERGY STAR standards will qualify for a rebate of \$345 per unit.

ENERGY STAR® Smart Thermostat

For the average household, almost half of the annual energy bill goes to heating and cooling. Installing an ENERGY STAR-certified smart thermostat to control your heating and cooling system can help you save money and earn a rebate of up to \$22. Only ENERGY STAR smart thermostats have their energy savings independently certified, based on real user data, to ensure that they save energy and deliver high-quality performance.

Heating & Cooling

Our Heating and Cooling program lets you earn a rebate when you replace your old, inefficient ducted air conditioning system.

Qualifying systems include :

A SEER (16.00) or SEER2 (15.20) is required for a rebate of (\$40)

- Heat pumps - Minimum SEER (16.00) or SEER2 (15.20)
- Straight cool / natural gas heat - Minimum SEER (16.00) or SEER2 (15.20) (new furnace required, propane gas does not qualify)
- Geothermal systems - 14.00 EER or greater

A SEER (17.00) or SEER2 (16.20) is required for a rebate of (\$550)

- Heat pumps - Minimum SEER (17.00) or SEER2 (16.20)
- Straight cool/natural gas heat - Minimum SEER (17.00) or SEER2 (16.20) (new furnace required, propane gas does not qualify)
- Geothermal systems - 15.00 EER or greater

Neighborhood Weatherization Program

Our Neighborhood Weatherization program helps qualified customers manage their electricity costs by making their homes more energy efficient. If your home is located within one of the geographic regions identified through the U.S. Census data that qualifies as a low-income community, we will provide and install an energy-saving kit at no cost to you. We will also seal the duct work and install attic insulation in homes that allow access to the attic.
