

Important Rate information for Commercial and Industrial Customers

Beginning in January 2026, updated rates will take effect based on the Florida Public Service Commission's December 2024 approval. This adjustment supports investments that strengthen reliability, harden the grid and expand fuel-saving energy sources – improvements designed to build a stronger, more efficient energy system and help lower customer costs over time.

The fuel charge will also be adjusted in January to reflect actual costs from 2025 and projected expenses for 2026. The cost of fuel is passed directly to customers with no markup or profit to Tampa Electric.

The temporary storm surcharge ends in August 2026, so your bills will be lower in September through December 2026.

This storm surcharge pays for restoration following the historic and destructive 2024 hurricane season. To lessen the impact on customers, the surcharge was spread over 18 months (March 2025-August 2026).

Commercial and industrial customers will see increases between 2% and 10% depending on usage. Refer to the table for rates that begin January 2026.
