

# IMPORTANT RATE INFORMATION

## For Residential and Small Commercial Customers

**Beginning in January 2026, updated rates will take effect based on the Florida Public Service Commission's December 2024 approval.** This adjustment supports investments that strengthen reliability, harden the grid and expand fuel-saving energy sources – improvements designed to build a stronger, more efficient energy system and help lower customer costs over time.

**The fuel charge will also be adjusted in January to reflect actual costs from 2025 and projected expenses for 2026.** The cost of fuel is passed directly to customers with no markup or profit to Tampa Electric.

**The temporary storm surcharge ends in August 2026, so your bills will be lower in September through December 2026.**

This storm surcharge pays for restoration following the historic and destructive 2024 hurricane season. To lessen the impact on customers, the surcharge was spread over 18 months (March 2025–August 2026).

**Based on all bill components combined, a residential customer who uses 1,000 kilowatt-hours per month will see an increase of \$8.88. Refer to the table for rates that begin January 2026.**
