

We can help you lower your electric bill

Energy savings are at
your fingertips with

FREE Energy Planner.SM

This interactive
program lets

you take advantage of lower rates that are available 87%
of the time. Join others who have already made the switch
to Energy Planner and start saving today!

Schedule a **FREE Home
Energy Audit** and let one
of our energy analysts help you
discover ways to use energy wisely
so you can get the most for your
energy dollar.

Tampa Electric also offers a
**Comprehensive Home
Energy Audit** for \$15. You may
also opt to receive an on-site
Building Energy-Efficiency Rating
System (BERS) test to rate your home's
energy efficiency. The cost for the BERS
test starts at \$239 for a Class I rating, \$160 for a Class II
rating and \$95 for a Class III rating (Class III is available for
new construction only).

Our many programs and rebates can help you save even more

As part of the **Free Home Energy Audit**, our Energy Analyst will:

- Check your attic for proper insulation. You may qualify for a ceiling insulation certificate through Tampa Electric's **Ceiling Insulation program** that can be used to add insulation.
- Check your air conditioning ductwork for leaks. You may qualify for our **Ductwork program**, where we'll seal your existing ductwork to stop the leaks and minimize future problems. A fee applies.
- Check windows and doors for proper caulking and weatherstripping.
- Check your hot water temperature and advise you of appropriate settings.

In addition, Tampa Electric's **Heating and Cooling program** enables you to earn rebates for replacing your old, inefficient air conditioning system with a new, energy-efficient heat pump that meets our energy-saving standards.

Call today for your own Home Energy Audit. It's free. It's easy. And it can really help you lower your electric bill.
