

Vintage rates continue in 2019

Starting in January 2019 your energy costs dropped compared to your 2018 bill. Starting in April, your electric bill should remain below 2018 levels, depending on your usage, even when the fuel portion of your bill is adjusted upward due to increasing costs of natural gas. Fuel costs are passed through from fuel suppliers to our customers with **no markup or profit** to Tampa Electric.

Starting in April 2019 and continuing through the end of this year, bills will be lower than last year and remain among the lowest in the state, even with this increase in fuel costs. This is all part of our commitment to safely provide reliable, affordable power to you.

More about your lighting costs

We've provided details for all lighting fixtures and poles on this sheet. The energy charge includes conservation, environmental and capacity cost recovery charges of 0.395 cents per kilowatt-hour (kWh). The fuel charge, 3.194 cents per kWh, is used to pay the fuel suppliers. A basic service charge of \$10.57 per month will be added to metered (customer-owned) street lighting accounts. Rate schedules are subject to gross receipts taxes, city and state taxes, and franchise fees, where applicable.

Have questions about your lighting account? Please visit tampaelectric.com/brightchoices or call us and follow the prompts for street lighting to speak with a representative:
